Subject: Make sure cleanup protect jobs

The EPA should care about our economy and jobs and the environment

If, under the EPA plan, the river cleanup were to lead to higher expenses for harbor companies and higher costs for consumers, that would mean a big hit on our economy. We do need a river cleanup but I hope that you'll also consider the costs to our economy.

In researching the clean up of the river I would highly recommend that encapsulation be considered so that the clean up does not does not cause further down stream issues by just moving the problem.

As you consider all the options, please don't support a plan that costs a lot of money and will force small companies to spend a lot on the cleanup.

Sincerely,
